

MUSANZE SAFE MARKET

CONTRIBUTION AND ACCOUNTABILITY RECORD

SWE 3409 - Mobile Application Development | Assignment 1

Item	Information
Project	Musanze Safe Market Field Inspection Prototype
Group	Group 13
Verification Code	MOB-G13-7341
Member 1	NZAYISENGA Erneste - 25/27341
Member 2	MANZI Cedrick - 25/27196
Member 3	INEZA Benitha - 25/27123
Member 4	KIRENGA Alain Thierry - 25/27792
Repository	https://github.com/nzerneste250/MOB_A1_G13
Current integration commit	4678771 - Update Group 13 app and testing evidence

1. Purpose of This Record

This document records the contribution, responsibility and evidence for each Group 13 member. It links the assigned roles to the implemented application, UI/UX report, testing evidence, repository work and final submission evidence. The information below is based on the project materials prepared for the Musanze Safe Market Field Inspection Prototype.

This record should be confirmed by every member after checking that the contribution listed under their name is accurate.

2. Team Roles

Member	Assigned Role	Main Responsibility
NZAYISENGA Erneste	Product and UX Lead	Product structure, user flow, UI/UX direction, project integration and documentation.
MANZI Cedrick	Device Integration, QA and Release Evidence Lead	Camera/gallery workflow, permission handling, Android testing, demo video recording, evidence preparation and release checks.
INEZA Benitha	State and Navigation Engineer	Form state, validation flow, bottom tabs, records/detail navigation and session behavior.
KIRENGA Alain Thierry	Interface Engineer	React Native interface implementation, reusable visual components and responsive screen layout.

3. Contribution Mapping by Member

3.1 NZAYISENGA Erneste - Product and UX Lead

Area	Contribution / Evidence
Product and UX	Helped define the market inspection flow: Home -> New Inspection -> Review -> Records -> Inspection Details.
UI/UX documentation	Contributed to the UI/UX report structure, group information,

	screen flow, information architecture, visual design and final screen evidence.
Project integration	Maintained the main project repository and integrated reviewed Group 13 changes on the main branch.
Documentation	Worked on README.md, project information, verification-code correction and supporting evidence documentation.
Repository evidence	Known commits in the current project history include 01e1c5a, f123751, 7d634c1 and 4678771.
Files / evidence	App.tsx, README.md, UI/UX document, evidence/AI_USE.md, evidence/TEST_LOG.md, evidence/TEST_LOG.pdf, screenshots and repository history.

3.2 MANZI Cedrick - Device Integration, QA and Release Evidence Lead

Area	Contribution / Evidence
Device integration	Responsible for Camera and Gallery workflow, image preview, replace/remove behavior and Android device integration checks.
Permission and cancellation handling	Contribution area includes camera/media-library permissions and safe return when camera or gallery selection is cancelled.
QA	The final test log records 20 PASS, 0 FAIL and 0 TO CONFIRM after group testing on Android with Expo Go.
Demo video and release evidence	Recorded/operated the final demo video MOB_A1_G13_DEMO.mp4 and supported release evidence preparation and final package checks.
Files / evidence	App.tsx ImagePicker sections, evidence/TEST_LOG.md, evidence/TEST_LOG.pdf, evidence/MOB_A1_G13_DEMO.mp4, screenshots folder.
Individual Git evidence	Insert Cedrick's own genuine branch/commit hash(es) before final submission if available in the repository history.

3.3 INEZA Benitha - State and Navigation Engineer

Area	Contribution / Evidence
State management	Responsible for inspection form state and in-memory record/session behavior.
Validation	Contribution area includes required-field checks, phone validation, risk/priority selection and consent validation before review.
Navigation	Contribution area includes Home, New Inspection and Records tabs, Inspection Details stack navigation and back behavior.
Evidence	TEST_LOG records PASS results for validation, valid form flow, bottom tab navigation, records stack navigation and saved-session behavior.
Files / evidence	App.tsx form/state/navigation sections, evidence/TEST_LOG.md, evidence/TEST_LOG.pdf, screenshots showing validation, saved records and details.
Individual Git evidence	Insert Benitha's own genuine branch/commit hash(es) before final submission if not already present in the repository history.

3.4 KIRENGA Alain Thierry - Interface Engineer

Area	Contribution / Evidence
Interface work	Responsible for interface engineering across the Home, New

	Inspection, Records and Inspection Details screens.
Components and layout	Contribution area includes cards, form controls, buttons, bottom navigation presentation, responsive spacing and readable mobile layout.
Visual consistency	Supported implementation of the green safety theme and consistent component presentation documented in the UI/UX report.
Evidence	Final application screenshots demonstrate the implemented catalog, validation, review, records and details interfaces.
Files / evidence	App.tsx interface sections, assets, screenshots/01_home_market_catalog.jpeg through 06_inspection_details.jpeg, UI/UX report visual-design pages.
Individual Git evidence	Insert Alain Thierry's own genuine branch/commit hash(es) before final submission if available in the repository history.

4. Shared Group Evidence

Evidence	Current Project Record
Verification code	MOB-G13-7341 appears in the app and supporting documentation.
Testing	All Group 13 members are recorded as testers; final test summary: 20 passed, 0 failed, 0 to confirm.
Screenshots	Six final screenshots: Home/catalog, empty records, validation, review, saved records and inspection details.
Demo video	evidence/MOB_A1_G13_DEMO.mp4 - recorded/operated by MANZI Cedrick (25/27196), Device Integration, QA and Release Evidence Lead.
AI disclosure	evidence/AI_USE.md lists ChatGPT by OpenAI and Codex by OpenAI and states that the group manually verified the outputs.
UI/UX report	8-page academic UI and UX design report with Group 13 information, wireframes, implemented screens, accessibility and team roles.
Repository	https://github.com/nzerneste250/MOB_A1_G13

5. Repository and Commit Accountability

The current main-branch integration commit recorded during preparation is 4678771 (Update Group 13 app and testing evidence). Earlier known commits include 01e1c5a, f123751 and 7d634c1.

Important: this document does not assign a Git commit to a member unless that commit is known to be genuinely authored by that member. If the lecturer requires individual meaningful commits, each member should add their own genuine contribution commit and enter the correct hash below before final submission.

Member	Branch / Commit Evidence
NZAYISENGA Erneste	Main branch known project commits: 01e1c5a, f123751, 7d634c1, 4678771.
MANZI Cedrick	_____
INEZA Benitha	_____
KIRENGA Alain Thierry	_____

6. Contribution Declaration and Member Confirmation

We confirm that the contribution information in this record is accurate and that each member can explain the work assigned to their role during assessment.

The project evidence and supporting documents correspond to the Group 13 submission.

Member	Registration No.	Confirmation	Date
NZAYISENGA Erneste	25/27341	Confirmed - 25/27341	01 October 2026
MANZI Cedrick	25/27196	Confirmed - 25/27196	01 October 2026
INEZA Benitha	25/27123	Confirmed - 25/27123	01 October 2026
KIRENGA Alain Thierry	25/27792	Confirmed - 25/27792	01 October 2026

7. Submission Files

MOB_A1_G13.zip - Expo project and supporting evidence.

MOB_A1_G13_UIUX.pdf - final UI/UX design report.

MOB_A1_G13_CONTRIBUTIONS.pdf - Group 13 contribution and accountability record.
